Create unique classic French design patterns. The possibilities are endless. Combine colors and shapes to define open spaces and achieve dramatic looks.

The rich colors of **French Oak** are due to its high tannin content. These same trees are used in French wine and bourbon barrels, and elegant old-world chateaus.

Wood is a natural material containing distinctive differences in color and grain configuration. It is these variations caused by nature that create the warmth and unique beauty of each hardwood floor. Wood swatches displayed may not show all potential variations of wood grain and shade.
